The First of the "ALL-AMERICA" Gladiolus Selection Winners

The outstanding varieties, ROYAL STEWART and APPLEBLOSSOM, shown on this page, have been deemed worthy of the "ALL-AMERICA" awards after having been tested in 30 AAGS Trial Grounds located coast to coast in the United States and Canada. The Trial Garden judges voted Royal Stewart this high award from the 1953 Trials. Appleblossom received the award in the 1954 Trials. These beautiful glads fittingly mark the formal debut of the "ALL-AMERICA" gladiolus in 1956.

ROYAL STEWART (1956)

Plant Patent No. 1339

Description: A truly remarkable new gladiolus variety that has been widely acclaimed for its consistently fine performance under an extensive test program throughout the United States and Canada. The lightly ruffled florets are five inches in diameter and are of good substance. They are a clear light red and the long flower-heads frequently carry up to 12 flowers open at one time. Growth is vigorous and healthy, with the total height of the plants running about 5 feet. On the occasions when it has been exhibited at gladiolus shows, Royal Stewart has proved to be an outstanding winner of top awards.

APPLEBLOSSOM (1956)

Plant Patent Pending

Description: A gladiolus of utmost delicacy of coloring, the predominating hue being snowy white with a faint touch of cream in the throat and an exquisite flush or corona of cool rose pink at the edges of the petals. Up to 8 to 10 trimly tailored florets, about 5 inches in diameter and of very heavy substance, are open at a time on spikes up to 5 feet tall. A vigorous, easy grower that performs excellently with only average culture. Appleblossom will give you a new conception of gladiolus beauty when it blooms in your garden.
